Remarks

Conversion can be done by electricmini.nl on request.

If a customer chooses another party to convert a mini, the customer needs to be assured that this is a professional party which has the necessary experience to convert the car safely and according to the regulations.

After conversion the customer has the duty to take the vehicle to a notified body to check the safety and quality of the conversion and to get the vehicle registered in the right way.

ElectricMini.nl cannot take any responsibility for how the conversion is done.

The manual and tech support are provided as an extra service. The customer remains responsible for the quality of the conversion and no responsibility for the correctness and completeness of the manual and tech support can be guaranteed by electricmini.nl

Specifications can be different from batch to batch. The specified range is the expected range under normal circumstances. The range depends highly on acceleration, vehicle condition and general road and weather conditions.
